4. Dimensions

All dimensions are given in millimeters (mm) except in the case of steel balls, tires and tire tubes.

Parts	Example	Interpretation
Bolt (Screw)	6×12	6mm diameter, 12mm length
Pin	8×14	8mm diameter, 14mm length

Tube	5×130	5mm inside diameter, 130mm length

5. Supersedence of parts

Part numbers given under the part name in the "Description" column indicate that the part number has been superseded by that part number. HONDA may make such supersedence without notice.

6. Assemblies

Sections framed with broken lines in the exploded view drawings are available as complete assemblies. (Their individual parts can also be obtained.)

7. Required quantity

The number given in the "Reqd. No." column indicates the quantity of parts used in the section described in that block.

Parts with quantities in () represent optional parts.

Part whose required number is "N", is part whose required number can be selected at need.

8. Part modifications and applicable serial numbers

In cases where a part has been modified, the serial number of the first vehicle (or frame, engine, carburetor) bearing the modification is listed in the "Serial No." column.

9. Color label

When you place an order of colored parts, please specify the part number from the list below.

The parts marked with 1 are given fixed parts number.

B425-0B

BMC3-0A

12. Construction of vehicle identification number (V.I.N.)

W.M.I.World manufacturer identifier

V.D.S.Vehicle descriptor section

V.I.S.Vehicle indicator section

Any change or modification of parts is directly related to the V.D.S. and V.I.S. A V.I.S. number will appear in the "Serial No." column of the Parts Catalog if a part is changed or modified.

III. How to use the flat rate time (F.R.T.)

This F.R.T. (Flat Rate Time) is used to determine the standard labor time allowed for replacement of parts covered by the warranty during the period the warranty is in effect. The F.R.T. for those parts which are not listed herein should be determined from the operation closely related to the replacement of that part.

1. The F.R.T. is based on the following servicing conditions

- A liberal allowance is added to the net servicing time.
- Standard times specified are based on the condition that the necessary servicing tools listed in the service manual (motorcycle) which describes the HONDA service policy are available close at hand and the work performed by a mechanic with normal skill.
- Time required for inspection and operational test following the servicing is included in the F.R.T.

2. Method of computing

The job times are listed in tenth of an hour to simplify computation.

- (Example) 0.3 = 18 minutes
5.6 = 5 hours and 36 minutes

CONVERSION CHART			
Hours	Minutes	Hours	Minutes
0.1	6	0.6	36
0.2	12	0.7	42
0.3	18	0.8	48
0.4	24	0.9	54
0.5	30	1.0	60

3. Computing the F.R.T.

When several jobs are performed at the same time, make the calculation in the following manner.

a. Jobs of non duplicated nature

The F.R.T. for the job is obtained by totalling the F.R.T. for each part replaced.

(Example) Replacement of cylinder and stator comp.

Service item	F.R.T.
Cylinder comp.	* 5.0
Stator comp.	0.5

The F.R.T. for the job is $5.0 + 0.5 = 5.5$

b. Jobs of duplicated nature

Take the F.R.T. for the last part to be replaced.

(Example) Replacement of cylinder head gasket and piston.

Service item	F.R.T.
Cylinder head gasket	* 4.6
Piston	* 5.2

The F.R.T. for the job is: 5.2

c. Jobs of partially related nature

Total up the F.R.T. for all of the parts replaced and then subtract the F.R.T. for the duplicated operation.

(Example) Replacement of gearshift drum and crankshaft assembly.

Service item	F.R.T.
Gearshift drum	* 5.0
Crankshaft	* 8.3
Crankcase disassembly	* 4.8

The F.R.T. for the job is: $(5.0 + 8.3) - 4.8 = 8.6$

Crankcase disassembly is the duplicated operations.

● The F.R.T. shown with (*) includes engine removal and installation.

4. Operations other than replacing parts
